

## CASE STUDY ON RECOMMENDATION SYSTEMS

The Jokes dataset is given [here](#). . Build a collaborative filtering based recommendation system on jokes rating.

Please note the following:

- Give headings to each step you are doing.
- Do the case study in Python.
- Create a repository in GitHub account as "Public".
- Upload the notebook file (. ipynb) to the repository.
- Please make sure that you are uploading the notebook file including the outputs as well.
- Share the link of this notebook from GitHub in the online text editor provided in Paatshala.
